

REAL COLOR

from an
Inkjet!

Precise dot control with the software plug-in allows 300 to 600 dpi printers to output extremely sharp images & smooth gradations. This page you're holding is an example!

Simply place DELTAe's plug-in in Photoshop's Import/Export folder...

Then access menu through Photoshop to print. It's that easy!

MUSEUM-QUALITY PRINTOUT
FROM STYLEWRITER, 1997

256 shades of grey and CMYK screens result from using the software plug-in - producing 16 million output colors (swatch in upper area of magnifying glass), a fidelity just not possible without the plug-in (swatch below).

DELTAe Software 212/966-9853 • Minimum System: Macintosh 7.5 or higher, 64800 or PC processor & 16 MB of RAM

a **marketing flyer** for printer software
—presented as a **'visual poster page'**—
that also **explains** the product's proprietary process
and serves as user setup **documentation**

each handout in itself a **demonstration** of the product
